**987 Punctures
But My Tire
Leaked No Air!**

J. W. Simpson writes that he has to date driven 987 nails into one old tire. The tire still stands up under full air pressure.

Makes Old Tires Like New

"I have tested Air-Stop on four tires that have not been used for about eight months; there wasn't one of the set that would hold up air two minutes before I injected Air-Stop into them. That has been eight days ago, and they still stand at 65 lbs. pressure."

—Roy Foutch, Indiana.

Drives 200 Miles on Tire Punctured 16 Times

Another proof that you can actually drive your car on punctured tires after treating with Air-Stop. J. S. Brush, Alabama, writes that he drove over 200 miles on a tire punctured with 16 nail holes—yet no air leaked out.

54 Spikes in One Tire!

"We received samples today and gave same a thorough test, using a 35x5 tire and driving 54 spikes into the same. Air-Stop has proved entirely satisfactory. Please send 100 sets via express."

—Ralph Gates.

AT LAST science has done it! For the past quarter of a century autoists have been eagerly waiting for this astonishing invention that makes any air-filled tire absolutely proof against nail punctures—and ends 95% of tire trouble a remarkably simple way! Experts claim that it is the most astonishing discovery of the decade

—and motorists everywhere are spreading the good news like wildfire! No wonder they are delighted.

Punctures Sealed While You Drive

Just think what the discovery of Air-Stop means to any man or woman who drives a car! It seals punctures the instant they happen—so that you go spinning along without even knowing you have a puncture. It does away forever with the fuss and bother of changing tires and patching tubes on hot, dusty roads—in blazing sun, in drenching rains, on dark nights or in freezing snowstorms.

No more slow leaks, valve leaks or porous tubes, either. Air-Stop seals them all and puts new life into old tires a surprising way. It thus prevents rim cuts and cracked sidewalls, too. And it adds tire mileage because it prevents driving with partly flat tires—one of the biggest causes of tire trouble!

Good-bye Tire Worries and Repair Expense

Air-Stop will seal punctures as large as a twenty-penny spike and as small as a tack. The same air pressure is used as before—you ride on air just as you always have. Air-Stop will not freeze in the coldest weather, and will resist the heat of the hottest summer day. It has no injurious effects on casing or tube. Actually helps preserve rubber and will last the lifetime of the tube. Only a few minutes are required to puncture-proof four or five tires with Air-Stop.

And in addition to adding 100% to the pleasure of motoring—think of the tremendous economy! With the present high cost of tires, the money Air-Stop saves in a single month cannot be estimated. One noted expert says he believes that Air-Stop will save \$5,000,000 for American motorists every year!

9 Out of 10 Motorists Want to Buy on Sight

So marvelously successful is this new invention—that salesmen who introduce it to friends and motorists are piling up big liberal commissions for just a few hours' work. Their reports of earnings run all the way from \$10 to \$15 an hour to \$37 an evening! Every auto owner is vitally interested, whether he drives a Ford or a Rolls Royce—for every man detests the trouble and delay of changing tires and mending tubes.

Air-Stop positively sells itself—all you do is take the money. Most sensational thing to demonstrate you ever saw. Simply drive nails in an old tire in front of big, interested crowds. When you pull them out and pressure still stays at 60 without a single leak—you can just imagine how fast the car owner is going to dig down into his pockets for the amazingly low price of Air-Stop.

If you have a car of your own, you can equip one of the wheels with an old tire to use for demonstrations. But you don't need a car—an old rim and discarded casing will be sufficient to bring you in \$15 to \$25 a day.

FREE Sample Offer!

Right now—to introduce his surprising invention, Mr. W. S. Hill (the discoverer) will send you a full-size sample at his own risk. This is an unusual chance to see for yourself how remarkable this new discovery really is—without risking a single penny. But that's not all—he will actually PAY you for your trouble in testing Air-Stop if you are not amazed and delighted with it. This generous offer is limited, so write at once for his liberal proposition. Be the Air-Stop man in your section and cash in big. Clip out the coupon now and mail it today!
